

# Portable Odorization Services

Authorized Sales & Service Center

**Mulcare Pipeline Solutions Portable Odorizer will fit any need.**

Pipeline pickling is a critical element in the proper commissioning of a new line. Timing gaps can exist in the removal of old odorization equipment and the installation of new. Temporary line odorization can be necessary to bridge the gap when budgets don't allow immediate odorization equipment purchases. These are just a few reasons why you may need our portable odorizer. You may rent our equipment or hire us to take care of it for you, either way we can handle your next project. Mulcare Pipeline Solutions will send an OQ Qualified technician to your site and provide the following services:

## **Ask for a project specific quote**

### **Completely Install & Configure the Portable Odorizer**

- Pre-Evaluate the job site & discuss parameters with you
- Transport Odorizer and tooling to your project\*
- OQ Qualified technician performs all work
- Configuration for flow or timing conditions
